

ONTARIO COLLEGE OF ART AND DESIGN UNIVERSITY

OCAD UNIVERSITY

World Futures Cities – A place where culture flourishes

- Mobilize artistic, creative industry and design disciplines of cities + urban planning capacity + smart city infrastructure – high speed connectivity, WiFi coverage, data collection and analytics
- Create culturally rich, diverse and livable cities

Livability

- Smart urban planning, transit, mixed use development, complete streets (with multiple forms of transportation, businesses, parks, cultural assets) – retain talent and allow for affordable living and disposable income.
- Supports cultural diversity – language translation etc.

Toronto's vision of a Smart City

- Smart cities are now about people, not driven by technologies.
- Holistic vision of future cities which engages the capacities of the public sector (libraries for example), the not-for-profit sector (physically located cultural entities) and industry.

Successful Cities

- Successful cities have strong cultural hubs, distributed experiences and accessibility.
- Fuels economy, integration, understanding well-being. Define and measure.
- Understanding the Value of Arts and Culture. AHRC UK, Geoffrey Crossick and Patrycja Kaszynska, 2015

New Forms of Cultural Expression

- Digitizing Shakespeare – C.J. Hervey of Secret Location and Anita Gaffney, Executive Director of the Stratford Festival
- Virtual Festival Orchestra – inside the performance
- Virtual Reality Macbeth
- <https://www.youtube.com/watch?v=PyPmDSi0nrU>

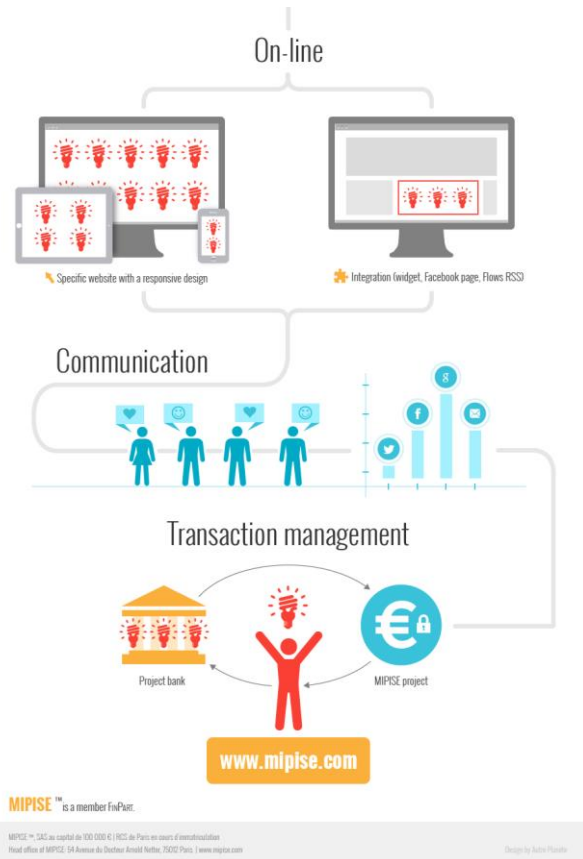

Cultural Infrastructure

- Transform historical buildings to be virtual as well as physical sites and network them – bring the Royal Ontario Museum to Scarborough – plan infrastructure from the beginning
- Make what is available more accessible using smart planning - transportation around cultural assets.
- Intra-neighbourhood connections through video conference – TIFF Bollywood to Brampton.

Digital Entities

- The most straightforward way in which digital technologies are affecting the cultural sector lies in how organizations are connecting with their visitors...revenue generating activities such as crowd-funding, social media, content publication, downloading and streaming.
- Creative networks for artists to share equipment (sharing economy) and production assets; ongoing collection of artistic activities; promotion – intertwine of local and global. Crossick

Real Time Collaboration

- Ability to collaborate with cultural producers around the world, as an artist or audience with broadband
- “The future is telepresence” e.g. DJ Spooky and Korea
<http://www.fastcocreate.com/3029001/dj-spookys-global-show-fuses-real-time-performances-in-new-york-and-korea>

Public Art

- Strategize its planning and placement, and relationship to other artifacts and sites
- Analyze the ways that cultural policy impacted content and style of art and artists, correlate placement with investment
- <http://www.theartfulcity.org/>

Cultural Analytics

OPEN DATA PORTALS 2012 / 2013

TOTAL	MONTREAL		EDMONTON		OTTAWA		TORONTO	
2012	5	9	16	33	5	8	3	8
2013	4	9	17	309	5(-2)	73	5	85
%	-5%	13%	-	11%	+2%	11%	+1%	7%
	18%		11%		9%		6%	

- Although it is characterised by enormous volume and variety, what really matters about big data is how it is used
- The limited character of data collection systems at most cultural institutions is a further constraint
- The cultural sector, argue Lilley and Moore, needs to see data as an asset rather than as a tool of accountability.

Cultural Analytics

- Data is critical to understanding cultural change, impact and economics. It allows us to measure and address flourishing neighbourhoods and cultural deserts.
- Large (urban focused) cultural data sets – longitudinal study regarding arts participants. Eurobarometer survey on participation includes Canada, Australia and the EU

Cultural Data Profile

- <http://culturaldata.org/> Insight for the arts.
- Allows NFP arts, culture and humanities organizations to collect and analyze their financial and audience/user data, and activities.
- Outputs are analytic reports and visualizations and annual reports.

Chicago Cultural Plan

- Strong Neighbourhoods, Innovation, Environmental Sustainability (reuse and alternative transportation), Public Health, Lifelong Learning, Public Safety, Well-being and quality of life. Measure impacts - Culture as cohesive
- “Artist360,” a sector-wide fellowship of rotating artists in corporate communication, social work, city planning, crisis management, early learning centers, and healthy living to incorporate creative skills into other sectors.

Chicago Cultural Plan – What to Measure

- Economic Impact-- “Culture attracts and retains creative professionals and their employers.
- Public Safety: Culture breeds positive street life. Culture revitalizes and sustains property values.
- Culture attracts transforms the lives of at-risk populations. Culture visitors regionally and globally, directly contributing to combats the anonymity that drives communities apart.

Cultural Tourism

- **Cultural Tourism** – requires data for planning and fund-raising – understand patterns, case study Nuit Blanche - Nuit Blanche is popular and the corporate world is solidly behind it — those are good things. Its economic impact since 2006 has grown from \$1 million to \$40.5 million 2014. 200,000 out of town guests. Data for crowd management, asset placement.

Cultural Tourism

- Need real time aggregated content that encourages them to explore cultural experiences, venues. <https://www.artsy.net/> Discover, research and collect the world's best art. Guide to art fairs, location aware.

Data as Art Form

- Bringing alive urban dynamics (data materialization)
<http://variable.io/> e.g. Marcin Ignac *Be in the Know Transport* for London with Saatchi, animals made out of transit line links.

Cultural Industry Economics

- Ultra high speed connectivity needed to ship assets (e.g. Toronto's analytics association).
- Animation – Guru Studios and House of Cool, ship assets internationally.
- Clustering physically while working from anywhere virtually – stimulus.

Clustering and Affordability

- Develop and measure mixed neighbourhoods versus gentrification – creative centres, businesses, creative industries, live/work spaces. Artscape in Toronto and Vancouver – creative place-making.
<http://www.torontoartscape.org/>
- E.g. Launchpad
- Find talent fast through just in time network

Clustering and Affordability

- Affordable housing, health care, childcare – access to content was one of the three top drivers for choosing a city.

Disintermediation

- Collaborative culture – NESTA
83 % of young people between 8 and 18 had made some form of culture and shared it – music, animation, web sites.

Design

- Establish design standards and measure impacts – zero carbon design, green roofs. E.g. James Elder. Understand and analyze impacts of decisions that are made – segue to Dr. Eric Miller

OCAD University Today

- Founded 140 years ago.
- Largest, most comprehensive art, design and media university in Canada and 4th largest in North America.
- 4,700 students in 15 undergraduate and 7 graduate programs; 9% international UG/23% graduate.
- As world transforms, OCAD University's 500 + faculty and students are leading change, building strong new competencies in human-centered technology design, strategic foresight, design thinking and big-data driven digital fields – visual analytics, wearable technology, and the Internet of things.
- Three Canada Research Chairs: Indigenous Visual Culture & Curatorial Practice, Design for the Future of Health and Design for the Internet of Things.

OCAD University defines excellence as the ability to mobilize the intrinsic power of art and design creativity to address the world's significant challenges.

THE UNIVERSITY OF THE IMAGINATION

Our curriculum and research programs have a real-world foundation in design. We activate data, materials and technology.

We combine human-centered research methods and design thinking with invention, experimentation, and interpretive qualities of art-making practices.

UNDERGRADUATE Bachelor of Fine Arts (BFA)

- 1. Criticism & Curatorial Practice**
- 2. Cross-Disciplinary Art: Publications**
- 3. Digital Futures**
- 4. Drawing & Painting (Digital Painting Expanded & Animation)**
- 5. Art and Social Change**
- 6. Indigenous Visual Culture**
- 7. Integrated Media (Integrated Media & Expanded Animation)**
- 8. Photography**
- 9. Printmaking**
- 10. Sculpture / Installation**

UNDERGRADUATE Bachelor of Arts (Honours) BA

- 1. Visual and Critical Studies**

UNDERGRADUATE Bachelor of Design (BDes)

1. Advertising
2. Environmental Design
3. Graphic Design
4. Illustration
5. Industrial Design
6. Material Art & Design
7. Digital Futures

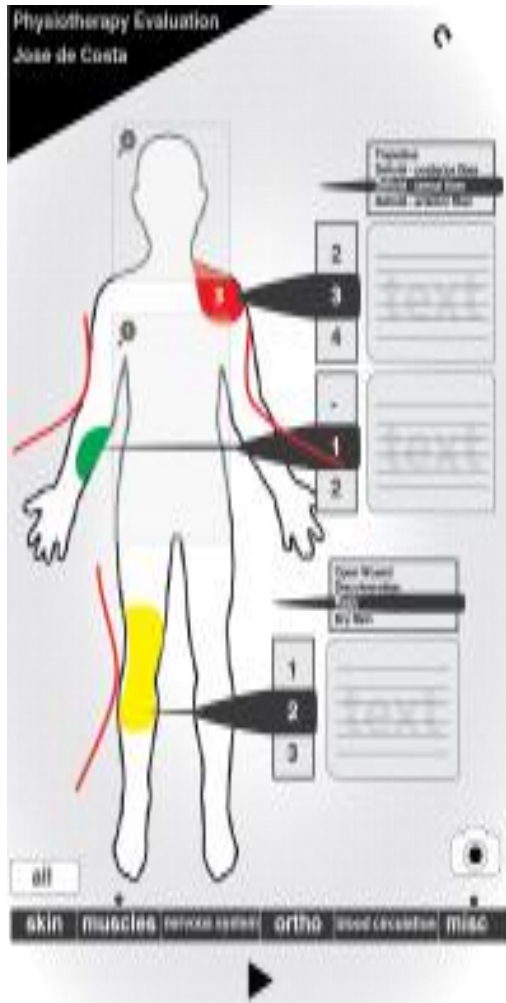

OCADU UNDERGRADUATE DEGREES

Shannon Lea Doyle 2013

GRADUATE STUDIES

GRADUATE PROGRAMS

1. Criticism & Curatorial Practice
2. Interdisciplinary Art, Media and Design
3. Digital Futures
4. Contemporary Art, Media and Design History
5. Strategic Foresight and Innovation
6. Inclusive Design
7. Design for Health

Boutique, highly interdisciplinary programs

OCADU UNDERGRADUATE DEGREES

The Master of Strategic Foresight: trans-disciplinary interweaving design, social science, technology, and business. Essential competencies: design thinking; strategic and iterative methodology; understanding human needs, wants and behaviours.

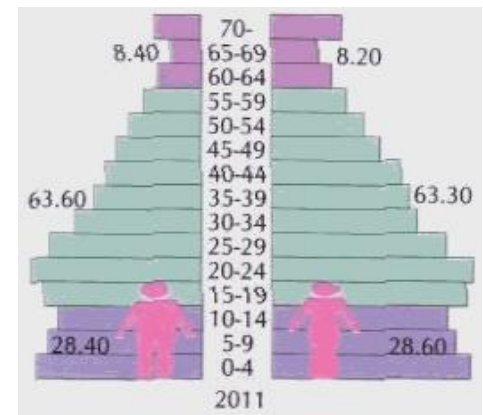

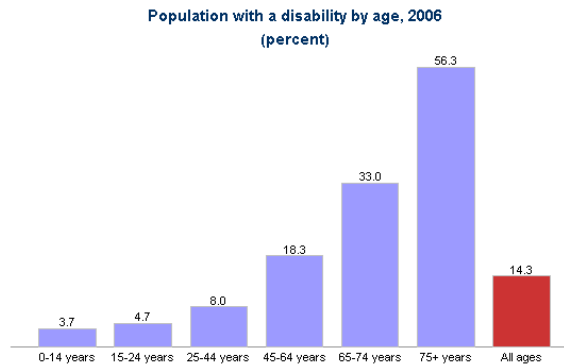

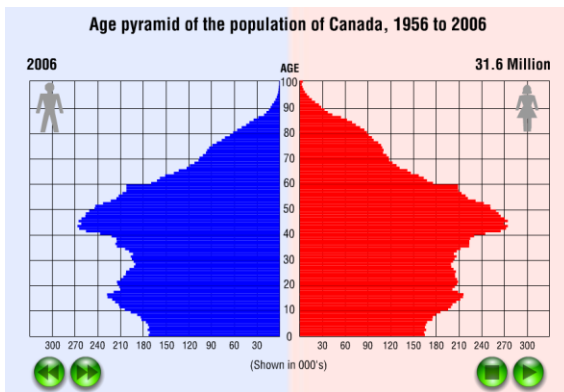

STRATEGIC FORESIGHT & INNOVATION

The Master of Digital Futures Program fuses together disruptive technologies and new thought leadership to form technology savvy leaders in digital applications, products, media content, practices and services.

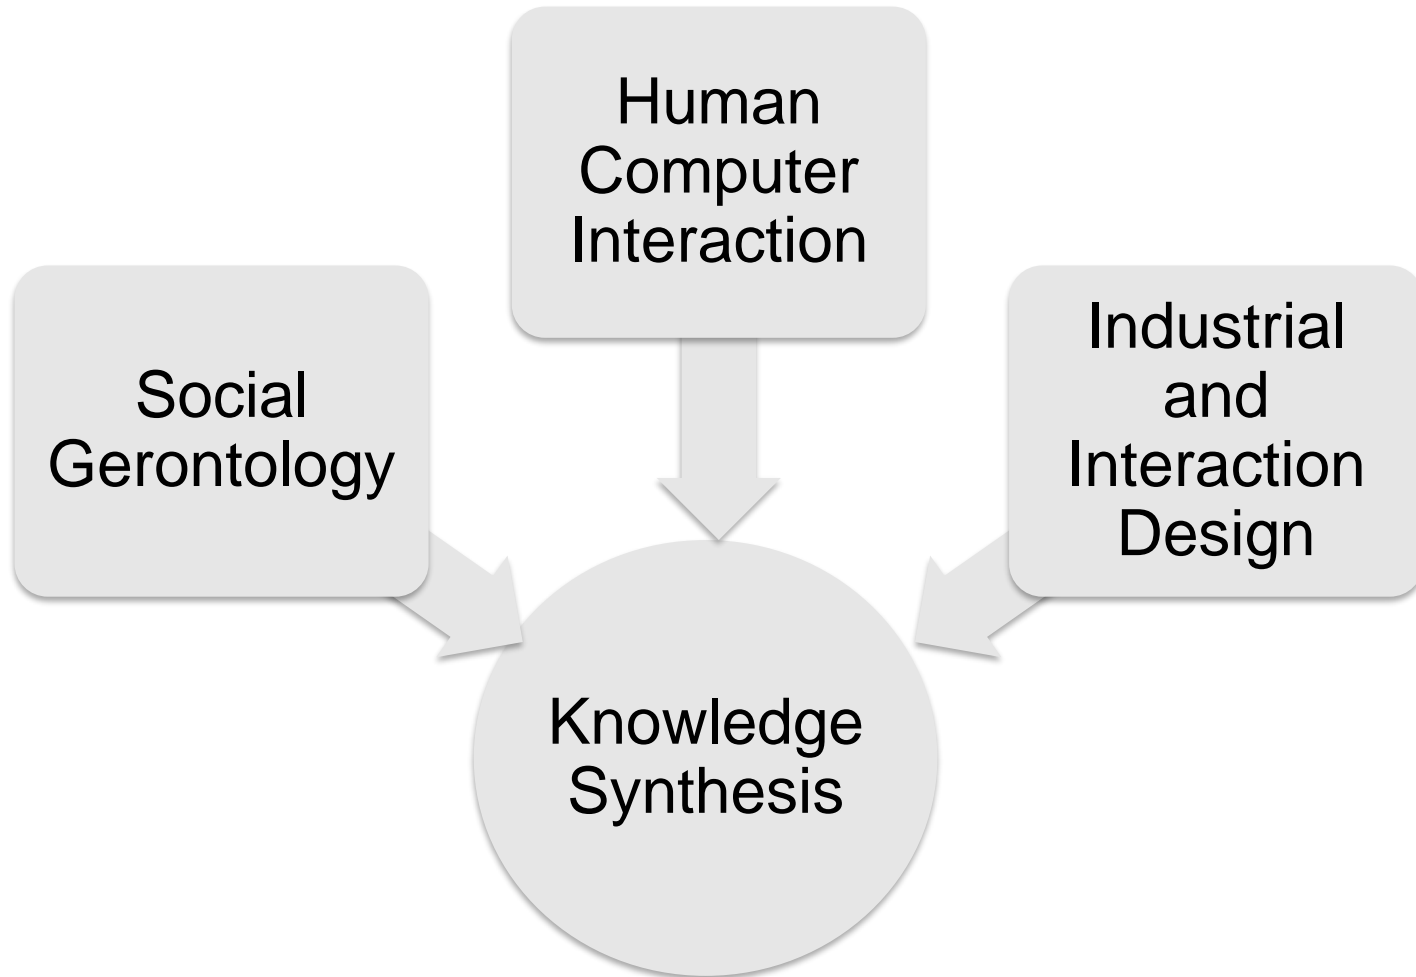

DIGITAL FUTURES

A two-year executive program is open to students worldwide, with online courses which use highly interactive instructional design techniques, multi-disciplinary seminars co-taught by leaders in the field, and a major project.

INCLUSIVE DESIGN

DESIGN FOR HEALTH

This is a cross-disciplinary, cross-institutional program of study, designed to educate curators and critics across all creative disciplines.

CRITICISM & CURATORIAL PRACTICE

Research and Commercialization at OCAD University

- Research/creation leader + research in design for health, curatorial practice and global culture, data analytics and visualization, digital economy, design engineering, social science and humanities.
- Research in wearable technologies, intelligent materials and textiles, 3D fabrication and advanced manufacturing and interaction design
- Partner in Canadian Centre for Aging & Brain Health Innovation led by Baycrest. Art and Neuroscience.

Inclusive Design Research Centre

- A global centre of expertise with nearly 100 partners worldwide that addresses how we design and develop information and communication technology systems so they are inclusive.
- Develops information and communication technology systems for people with varying abilities, languages and cultural preferences.
- Related graduate program in Inclusive Design.
- Supported by ORF-E, ORF-RI, CFI, William and Flora Hewlett Foundation, The Andrew W. Mellon Foundation, SSHRC, OMDC, IBM, Blackberry, U.S. Department of Education, European Union.

Visual Analytics Lab

- Drives research in data extraction, information analysis and scientific visualization in partnership with industry clients such as Boeing, the *Globe and Mail*, N-Logic, PWC, IBM and research hospitals.
- Co-PI with the Centre for Information Visualization and Data Driven Design (an industry, York University and OCAD U partnership).
- International partnerships with Brazilian and Canadian universities and hospitals.
- Theme Leader for Visualization research in iCity and BRAIN ORF-E projects.
- Supported by ORF-E, NSERC, SSHRC, OCE, MITACS.
- Related graduate program in Digital Futures and undergraduate programs in Industrial Design and Graphic Design.

Strategic Innovation Lab (sLAB)

- Develops and applies strategic foresight, design thinking and visualization prototyping methodologies.
- Integrates academic research, professional engagement, education and skills development for stakeholders in the private, public and not-for-profit sectors.
- Clients include Government of Canada Policy Horizons, SSHRC, OMDC, Ontario Government (MRI), United Way, Scotiabank, AT&T.
- Related graduate program in Strategic Foresight and Innovation.

INDUSTRY PARTNERS IN RESEARCH & INNOVATION

Imagination Catalyst Incubator – Design and Digital incubator

- Current 3,000 square feet provides co-working space for up to 25 creative companies and social ventures each year, while also leveraging OCAD University's investment in world-class technology, maker studios, research labs and specialized maker equipment such as 3D printers.
- Imagination Catalyst entrepreneurs have access to business advisors, professional service providers, and an extensive mentor network as well as government funding opportunities.

Connect with real therapists from where you feel

sign up today

Hold **secure video sessions** with your therapist from anywhere

Get matched with licensed therapists who **understand your needs**

Track thoughts and emotions that **drive your daily life** with a free tool

Affordable

Only pay per session with no additional fees and commitments

Accessible

Reach a therapist from anywhere at anytime

Personalized

Customized therapy experience that suits your needs

TranQool is an e-mental health platform that matches patients and therapists, provides a secure video therapy environment and Daily Emotional Tracker app, all designed to improve health outcomes

Creative business & design skills for cultural entrepreneurs & young startups

DesignJam

BigTent Events

Toronto 100+
Waterloo Region 100+
Focus on traffic & transit
food insecurity
homelessness & more

Workshops

Hands-on training by
experts in design thinking
visual production,
sustainable service design
future-forward business

Toolbox

Online videos & tools
for self-development
design for people
strategic foresight
startup culture

Ontario Centres of
Excellence

McCaul Street Creative City Campus

- The Creative City Campus project will revitalize and expand the core of OCAD University's campus.
- The fundamental goal is to ensure students have full access to technology-enabled studio-based and experiential learning.
- The project will add 55,000 square feet of new space and upgrade 94,700 square feet of existing space to:
 - expand and refurbish studio spaces and fabrication technology
 - construct collaborative learning spaces in the Sharp Centre for Design
 - create the Grange Park Room and Student Commons
 - create an Indigenous Visual Culture Centre
 - revitalize and expand the Art and Design Library for the Future
 - develop a Centre for Experiential Learning, located at 115 McCaul St.
- The total project cost is approximately \$60 million, with \$27 million in funding from the Government of Ontario.

Proposed Campus for the Connected World on Toronto's Waterfront

- New facility for research and innovation including a shared commercialization and incubation led partnership with IBM to which OCAD University would bring strengths in strategic foresight and design thinking to emerging technologies.
- OCAD University's proposed new home for human-centered technology design, digital media, green technology research, incubation and learning would be part of the emerging innovation hub on Toronto's Waterfront.
- Toronto's waterfront is a living laboratory that will benefit from a leading edge creative research and learning partner.
